LoserCoin Information Summary ..... 21

## “I LOWB YOU”

What would happen if a crypto-currency project is founded by two Losers?

All of this originated from the whimsical imagination of two Losers, although at that time we couldn't imagine that a purely entertaining project could trigger such a revolution in the crypto-currency circle.

In the real world, the gap between elites and civilians is wide. That's why we built such a world in blockchain, a community which is formed by Losers.

As we move away from the real world, and leave aside the traditional financial structures, this community is our new world, where we are free to discover new ways to solve problems and connect with each other.

Indeed, the voice of one Loser is small, and the voice of ten Losers is small. What about a thousand? Ten thousand?

When those Losers who have experienced failure connected with each other, they will form a community. By reflecting on the projects that failed us, we realized that the real power does not come from any single person among us, but can come from us as a community.

**“The revolutionary river water is pouring; as long as the river merges here, it will definitely destroy the dyke” -C-Block**

With such a clear objective, in order to unite the Losers, we began to seriously develop the LoserCoin ecosystem.

## What is LoserCoin?

Losercoin is a project initiated by two poor guys from China, one is a father of two kids from a village, the other one is a coder living a miserable life by working 60 hours a week. Two founders first heard about Bitcoin in 2017 and lost a shit ton of money trading it. They started this project as an open journey and were fully prepared to lose everything. The two founders have added their whole life savings into the liquidity pool. It is guaranteed that the project team will not manipulate the price of \$LOWB due to lack of capital, and there will be no rug pull.

LoserCoin official website:

<https://losercoin.org/>

The worldwide Losers are at a critical moment right now.

We have seen the outbreak of COVID-19 in 2020, forcing many people to lose their jobs; we have seen that when large companies developed vaccines, they refused to help people in the less-developed countries; we have seen that the Federal Reserve announced the QE3, and the rich people became richer. When there are nouns such as "privileged vaccine", "power priority", "price increase", "inflation" and so on that ignore the survival of Losers, we could see how small Loser's voice was.

A few months after these events became international news, Bitcoin has just completed its historical peak. The origin of crypto-currency is from Bitcoin, and Bitcoin was born to fight against privileged powers. In the ever-changing world economic situation and political landscape, crypto-currencies without a community can only helplessly fight for its survival. For Losers, the rules of the game never favored them; hence we have to build a community to help ourselves, to co-survive.

## Our background

### 1. Self-intro of the creator

For some people, they wear suits and leather shoes, they wear gold and silver, they can have beauties in both arms, they are handsome men or women, they talk about crypto-currency and their lives... However, they have nothing to do with us.

We are just Losers. Our homes are surrounded by walls. Our clothes are ragged. The only outfit we can get is the old coat gifted by my mother four years ago. Classmates and friends said that we both look like beggars, and we have instant noodles for lunch every day.

As far as I can remember, we are two Losers. We met in high school and we messed up almost everything. Really, in high school, no girl would look at us; we lose every game, even the teacher laughed at us. We swore that when we grew up, we must be better selves.

But after many years, somehow, we repeated the mistakes of our childhood. In Shanghai, we failed; also in crypto-currency, we lost a lot of money. So, when we think of LOWB, our requirements are not high. We want to make the bar lower, and lower, and hey, just lie down. However. LOWB is our greatest victory ever.

Since having such an idea, we now have a complete Loser community. LOWB has only been in circulation for half a year, but now, we have more than 140,000 Losers, and there will be more and more.

This is the beginning of a Loser revolution. As the proud founder of LoserCoin, we have put our life savings in the liquidity pool. We promise not to run away ever.

Now, our question is: Are you low enough to be a Loser? Let the Losers come back and be great again! Join our Loser community and get your own LOWB token!

## 2. The cry of the rise

“FUCK THE WORLD” – a shout from a Loser in the community.

This cry interprets the consensus of our community to some extent. We believe that by gathering the power of all Losers, we can create something more powerful than Bitcoin can create. If there is no unity of every Loser, the shout of “Fuck the world” is meaningless.

From the establishment of LOWB, we have been known as the No. 1 meme coin in China. This is not just a name. For many people, it is a belief. It is the motivation to get up every morning to face the world. It becomes the username, signature, and avatar of these supporters. Of course, the avatar is from Loserpunk, which is the Loser’s version of Cryptopunk.

Whether you are a new LOWB or an old LOWB, if you want to stand under the banner of LOWB, you must follow our founding principles:

1. Losers are not afraid of price going to zero.
2. We are not a pre-allocated team. The talented members behind LOWB have not cooperated before. They are a new team formed by a group of Losers. When you join the LOWB army, no matter where you are in the world, you will be able to find a position where your talents will be best used in this army.
3. We will do name-calling together. (Imagine the scene where more than 100,000 members in the telegram group snorted together).

If you accept all of these, then we will say to you: “I LOWB YOU”.

# Introduction to LoserCoin Ecosystem

## Why BSC?

Because the transaction fee of the BSC chain is low.

## Only BSC?

In addition to the BSC chain, we also support other chains. ETH, Polygon and OEC are the chains we support currently.

## So, what ecosystem has been built on the three chains?

### 1. LoserSwap

We are committed to building the best decentralized ecosystem on the planet. Our token is the seed of the LoserCoin ecosystem, and LoseSwap is the basic staking platform for LoserCoin.

We are loyal to the holders, who provide us with the means to grow exponentially. We will continue to expand this ecosystem so that it may bring more and more people to the LoserSwap platform.

Our unique token economics, reliable design, solid technical implementation, and the viral growth will enhance the power of the platform and ultimately bring additional benefits to the ecosystem.

We know that with the strength of our unity and the strength of Losers, we will successfully make improvements to the entire ecosystem, which allows us to reach new spectacular heights together.

The future will be better!

The tokens of LoserSwap

The development of LoserCoin token and LOWB Army has exceeded expectations. As of the release time of this document and the release of LoseCoin, we have become a decentralized ecosystem.

This makes \$LOWB to go beyond its own definition, which is why LoserCoin will become more sustainable and compelling. LoserCoin will focus on the following items:

Loser Coin: \$LOWB

On LoserSwap, LOWB can be mined. On this, we specifically cooperate with abroad teams.

LoserSwap's Liquidity Protocol (LP) includes:

LOWB mining LOWB

LOWB mining GAME

LOWB + USDT LP pair mining LOWB

LOWB + GAME LP pair mining LOWB

Then, these mining pools will distribute rewards in proportion to the holders of the aforementioned token pools.

LoseSwap URL: <https://app.loserswap.org/>

## 2. Loser 's community

We have a strong community forum. Every moment there are Losers scattered all over the world on the Loser forum (<https://losercointalk.org>), sharing their own failure stories, and explaining their own views on this. There are viewpoints on the world economic situation; there are also comments and analysis from major financial websites every day; there are LOWB briefings that produces original content every day. These stories from each Loser, sometimes make people laugh and sometimes fall into deep thought. When you resonate with the author's article, you can use the "reward" button under the post to tip the author you like. Your support is also one Loser's support for another Loser. This is what we want to see.

We have always been emphasizing that there are Losers in the world, and we will not forget any Loser. Losers in the English-speaking world will publish posts on LoserCoin\_Official ([https://www.reddit.com/r/Losercoin\\_Official](https://www.reddit.com/r/Losercoin_Official)) every day. This is their base. At the same time, our Twitter ([https://twitter.com/loser\\_coin](https://twitter.com/loser_coin)) is constantly publishing the latest roadmaps. At present, more than 20,000 losers have followed us. When you see these sentences, you should know what to do ☺.

Want to get instant feedback from Losers?

Telegram group of 100,000 Chinese Losers: [https://t.me/Loser\\_coin](https://t.me/Loser_coin)

Telegram group of 30,000 English Losers:

[https://t.me/Loser\\_coin\\_english](https://t.me/Loser_coin_english)

We welcome the arrival of every new Loser. Many interesting topics have been born here, and laughter has always been the main theme.

### 3. NFT Sector

#### 1) LoserPunk NFT

LOWB has currently issued 666 NFTs on its own NFT platform, LOWB NFT Market (<https://losernft.org>). The Loserpunk sold at the highest price is number #000, named Loserking, and the transaction price is \$7,000 (40,000,000 LOWB) on the day sold.

#### 2) LoserCoin All-Profession NFT

The All-Profession NFT blind box is a special NFT work created by artists from the LoserCoin community to salute to Loser workers in all walks of life. The total number of NFT blind boxes is 10,000, with the coverage of 100 occupations.

The LoserCoin All-Profession series of blind box are issued on GateIO. As of the time of writing, the LoserCoin all-professional series of blind box activities have been ranked first in the GateIO popular NFT collections. The total transaction amount has reached 204.2K (USDT), and the number of holders has reached 1051. At present, the highest transaction price of a single NFT has reached 299USDT, which is a premium of 3,222% compared to its original price.

#### 4. Game Sector

LoserCoin currently has a variety of games, dedicated to adding entertainment to Loser's lives.

Game platform URL: <https://losergame.org/>

The main games are as follows:

##### 1) LoserPoker

LoserPoker is a web H5 game, which contains 6 games such as mahjong, slot machine, fishing, Chinese dragon, and run-fast Poker. Compared with the well-known QQ game, LoserPoker is simpler and more exciting. No account password is required to log in. After connecting to the wallet, you can experience all the exciting games.

With absolute fairness, each wallet address will have 20,000 gold beans as the initial amount every day. Golden beans are refreshed at 0 am every day, and the golden beans you earned the day before will be zeroed. You can check the top 20 records through the leaderboard in the upper right corner of the game homepage.

Oh, by the way, if you still feel unsatisfied, we have also prepared tournaments for you, such as Doudizhu tournament, Two-player Mahjong tournament, and run-fast Poker tournament. Some extra games are coming soon: Chinese Chess and Texas Hold'em. Stay tuned!

Game URL: <http://lbgame-h5.Loserpoker.net>

## 2) LoserLand

Prologue: The Age of Punk

Long, long ago, a group of Loser punks lived on the continent of Luther. Their biggest hobby is to pick up free coins. Every day they are prepared to pick up the LOWB on the ground everywhere.

However, behind this seemingly peaceful life, a crisis is coming quietly.

Chapter 1: Squid Game

In June of the first punk year, in an adventure, a punk discovered a square gold mine. He excitedly greeted his friends to come to the mine to mine LOWB.

Soon everyone discovered that the closer to the center of the mine, the richer the mine is. Everyone scrambled to get closer to the center, and even attacked each other.

Should they leave the game and return to a life of Loser, or to fight with fate and become a successful punk? The punks are about to make their decision.

Game instructions

(1) The game is an on-chain game. All actions will consume action points. When the action points are insufficient, the player will not be able to perform any operations. When the action point is less than 10, please exchange 1000 gold coins for 100 action points in time.

(2) Lutherland is a turn-based game, and each person can only move once per round. The S1 season included 188 rounds. In the entire game, players tries to grab as many treasure chests as possible through 188 operations.

(3) All players share the same system time, and the game system advances to the next round every half an hour. Players can plan the movement in each round in advance, but the treasure chest can only be opened when the system time reaches the corresponding round.

(4) When the player opens the treasure chest alone, all the gold coins in the treasure chest will be awarded to that player. When multiple players open the treasure chest in the same round, they share the gold coins.

(5) After the game is over, players will share the total LOWB rewards in proportion to the amount of gold coins they earned.

Game URL: <https://Losernft.org/game>

### 3) Taoyuan Stone Gates

In the Middle Ages, a group of happy little LOWBs living in Xiayuan Village. One day a group of idle LOWBs came to the nearby water pool under Shijia Mountain to play water. Suddenly, they found a new path which was never been explored yet...

They walked along the path, and there were pink peach blossoms along the way. After crossing the flower path, they met and saw a huge stone cave. There are ten stone gates in the cave, and the stone gates are respectively engraved with "Peach Stone Road", "Luomen Port", "Luchengguan", "Xianwu", etc.

The LOWBs approached and found that there was a small stone cave under each stone gate. The cave was just enough to put coins such as LOWB and okt. The LOWBs tried to throw some LOWB and okt into the caves; after a few trials, they found that a stone door suddenly opened.

There was a luminous token (NFT) in the pocket of LOWB who had opened the correct stone gate, and the token guided them into the gate. Later, they discovered that after every ten trials, one stone gate would open, and the person who had opened the correct stone gate would disappear.

The LOWBs were amazed. They didn't know where their missing friends went, and of course they didn't know that the follow-up story was slowly unfolding...

game instructions:

In the prologue, game players can use LOWB to participate in the lottery. A prize will be randomly drawn after 10 participants. Winners can get the NFT of Shimen token, which will be used as the key to the next game. At the same time, players who participate in the lottery can also get some Wuyang Stone. Wuyang Stone will be used as the gold coin in the following games.

The game backend will be deployed on the OEC test chain

Game URL: Coming soon

#### 4) LOWBCraft

LOWBCraft is a blockchain game similar to the classic game "Minecraft". The economic system in the game will focus on LOWB. There will be a thrilling gunfight mode, as well as the favorite leisure and entertainment mode.

Its appearance will bring a different ecology and vitality to LoserCoin. The development team will release the game soon, so stay tuned!

Game Demo:

<https://opensea.io/assets/matic/0x2953399124f0cbb46d2cbacd8a89cf0599974963/26273198471925277313353141987825348566112633703028005703181410322685758537729>

## 5) Shorting mechanism

Users can stake usdt assets to borrow a quantity of lowb equal to 85% of the collateral value.

Formula of Borrowing Fee:  $\text{borrowing fee} = \text{value of lowb lent} * (\text{current block} - \text{lent block}) * (\text{interest rate base point} / 1000000000000)$ .

Formula for calculating risk level:  $\text{risk level} = (\text{borrowed coins value} + \text{borrowing fee}) * \text{lowb price} / \text{staked usdt}$ .

The user can get back the staked usdt after returning all the lowb with the incurred borrowing fee.

However, when the risk level exceeds 95%, anyone can initiate a forced liquidation, forfeit the borrower's usdt to the contract and receive a commission of \$2.

After the forced liquidation, the user does not need to return the borrowed lowb, but also can not redeem the staked usdt. So the user should pay attention to control the risk level and avoid the forced liquidation when the price rises sharply.

How to borrow \$LOWB for shorting

Suppose the price of lowb is \$1. User A stakes 100 usdt and borrows 80 lowb on the first day. After borrowing, user A immediately sells lowb and gets 80 usdt. (At this time, it is equivalent to using 20 usdt shorting 80 lowb, which is 4 times leverage.

The next day, lowb falls to \$0.75, at which point the user spends 60 usdt to repurchase 80 lowb. After returning 80 lowb and 1 day's interest of 0.1 lowb, user A gets back 100 usdt, netting 20 usdt.

Another possibility is that the next day lowb rose to \$1.2, at which point the risk level rose to 96%, exceeding the liquidation

threshold. After liquidation, the user cannot get back the pledged usdt and has a net loss of 20 usdt.

## 5. Metaverse Sector

LoserCoin has always focused on the meta-universe development and firmly believes that the meta-universe is a necessity of human life in the future. This is a paradise for Losers. We are currently cooperating with a game company in Singapore and are working on related ecology.

At present, LoserCoin has been listed on the meta universe section of FeiXiaohao: <https://www.feixiaohao.co/concept/73.html>

---

## LOWB D. A. O

We created the LoserCoin governance mechanism on Snapshot .

Everything has an end. Everyone will have the day to leave. Since there is no centralized team, no funds, and no direct leadership, what will happen to LOWB if every founder leaves? Does decentralization really work? How can we guarantee things are driven entirely by the community, like BTC or DOGE?

When the Losers stayed here to protect the community from scammers and crooks, the team of volunteers did an amazing job and built the future of LoserCoin through Snapshot .

This mechanism is the beginning of a new era for Losers. When the time is right, LoserCoin will become a key link between the decentralized world and the global Losers, enabling us to realize our vision of widespread adoption of DeFi cryptocurrency.

Finally, we would like to say thank you to all of you who chose to stay in the Loser community. Without your participation, we would not have known that there will be so many Losers with the same fate in the world. Although there are tens of thousands of stories about failures we had, finally we meet with each other. The Losers are closely connected and we voice together, loud enough to make the world hear.

"I LOWB YOU".
